PROFILE SUMMARY

BSc (Hons) Information Technology undergraduate at SLIIT, specializing in Artificial Intelligence, with a strong interest in AI, Machine Learning, and Full Stack Development. Currently building academic and personal projects using Python, Java, Spring Boot, React, and machine learning technologies. Interested in applying technical knowledge to real-world software solutions while continuing to grow through hands-on experience and continuous learning.

EDUCATION

St/Joseph Vaz College Jan 2009 - Dec 2022
G.C.E. Advanced Level (A/L) – 2022/ 2023
Subjects: Physics(C), Chemistry(S) and Combined Mathematics(S)

Advanced Certificate in Information and Communication Technology (BCI) May 2023 - July 2023
Completed in 2023,
covering: Web Designing, Enterprise System Administration, Database Management Systems, Java Programming.

Sri Lanka Institute of Information Technology (SLIIT) Aug 2024 – Nov 2028
BSc (Hons) Information Technology – Specializing in Artificial Intelligence
Relevant Areas of Study: Machine Learning, Artificial Intelligence
Most Recent Semester[Y2S2] GPA: 3.12/4.0

PROJECT EXPERIENCE

Artificial Intelligence

Hotel Customer Support Multi-Agent System Personal Project | 2026

- Developed an intelligent hotel virtual assistant that goes beyond a traditional chatbot by implementing an Orchestrator-Agent Architecture.
- Instead of using a single AI prompt, the system dynamically understands guest requests, classifies intents, and routes tasks to specialized agents responsible for different operations.
- This system splits front-desk tasks across 6 specialized agents.

Fully automated (Using n8n) football news platform Personal Project | 2026

- Built a modern automated football news platform using MERN stack and workflow automation.
- Automated daily content generation and publishing using N8N workflows.
- Integrated NewsAPI to collect latest football headlines from multiple global sources.
- Connected Google Gemini API to generate AI-based blog content and chatbot responses

SkillHub – AI-Powered Skill Assessment & Recruitment Platform Academic Group Project | 2026

- Built an intelligent talent acquisition platform integrating a React frontend, ASP.NET Core backend, and a Python FastAPI AI microservice.
- Engineered an autonomous Skill Assessment Agent that extracts role-specific skills and key responsibilities via read-only backend API tools.
- Integrated Monaco Editor and Judge0 API for real-time multi-language code compilation and evaluation.

Plant Disease Detection Web App Academic Group Project | 2025

- Developed an AI-powered web application to detect plant diseases from leaf images using a CNN model.
- Built backend services using Python and Flask for image processing and prediction handling.
- Trained and tested the model using the PlantVillage dataset for accurate disease classification.

Full Stack

E-Commerce Shopping System Academic Group Project | 2025

- This project is a fully functional web-based shopping mall designed to facilitate e-commerce operations.
- It is built using Java Spring Boot, MySQL, and a dynamic HTML/CSS/JavaScript frontend.

RouteLK public bus booking system Academic Group Project | 2026

- Developed a full-stack public transportation platform for searching buses, checking schedules, fares, and real-time seat availability.
- Built secure JWT-based authentication and role-based access for passengers, bus owners, and administrators.
- Integrated an interactive chatbot to assist users with transportation-related queries and improve user support.
- DEMO

TECHNICAL SKILLS

- Languages: Python, Java, JavaScript, TypeScript, C#
- Frameworks & Libraries: FastAPI, Spring Boot, Node.js, React, LangChain, LangGraph, Flask, Express.js, React Native
- AI & ML Tools: AI, Machine Learning, Generative AI, RAG Systems, AI Agents, LLM-based Applications, OpenAI APIs, Scikit-learn, OpenCV, Pandas, NumPy
- Databases: PostgreSQL, MongoDB, Vector Databases, MySQL, File-based Storage Systems
- Dev Tools : Git, GitHub, Maven, n8n
- Deployment & Cloud : Railway, Vercel, Render
